

# Black Sex Link

The Black Sex Link is bred from a **Rhode Island Red Rooster** and a **Barred Plymouth Rock Hen**. As chicks their sex is identifiable by color – cockerels will have a patch of white feathers on his head – pullets will not. Cockerels will look nearly identical to Barred Rocks as chicks and adults. Pullets are black chicks with varying amounts of red on the face; they grow out in the same manner.

**Summary:** Dual Purpose, Egg Production, Color Sexed
